

## \$WOLFGEN TOKENOMICS

The \$WOLFGEN token is structured to balance trust, sustainability, and long-term growth, while creating strong incentives for community participation and ecosystem expansion on Solana.

### Token Details

Token Name: WOLFGEN

Ticker: \$WOLFGEN

Blockchain: Solana

Total Supply: 1,000,000,000 (1 Billion Tokens)

### Transaction Tax Structure

To support growth while maintaining healthy trading activity:

2% – Liquidity Pool → Enhances depth and price stability

2% – Marketing & Growth → Funds partnerships, expansion, and visibility

1% – Community Rewards → Incentivizes holders and engagement

Total Tax: 5%

Note: Tax can be reduced in later phases to encourage higher trading volume.

### Token Allocation

40% – Public Supply / Liquidity

20% – Community Incentives & Rewards

15% – Development & Ecosystem Growth (Treasury)

15% – Marketing & Partnerships

10% – Team Allocation

### Locking & Vesting Strategy

This structure is designed to build trust, prevent early sell pressure, and ensure long-term commitment.

### Liquidity Pool (LP)

100% of LP tokens locked

Duration: 12 months

Reason:

Prevents liquidity removal (rug pull risk) and guarantees a stable trading environment.

### Team Allocation (10%)

100% locked at launch

6-month cliff (no access)

Vesting over 18 months (gradual unlock)

Reason:

Aligns the team with long-term success and prevents early dumping.

 Development & Treasury (15%)

70% locked

30% available for immediate development needs

Locked portion released gradually over 6–12 months

Reason:

Ensures operational funding while maintaining accountability and control.

 Marketing & Partnerships (15%)

50% locked

Remaining 50% used gradually

Locked portion vested over 6–9 months

Reason:

Supports consistent growth without flooding the market.

 Community Rewards (20%)

Unlocked but distributed gradually

Used for:

Incentives

Campaigns

Airdrops

Staking rewards

Reason:

Drives engagement and ecosystem activity over time.

 Overall Lock Insight

Approximately 70–75% of total supply locked or vested at launch

This ensures:

Reduced sell pressure

Strong investor confidence

Controlled token circulation
